24BIT / 32kHz - 96kHz **AD-Converter** ADHQ2496

Fig.1 AD-Converter / Art.No. ADHQ2496-TB

AD- Wandler ist mit Der einem 24Bit/115dB/32k-96kHz Wandler, zwei elektrisch oder trafosymmetrischen Analogeingängen und vier AES- Aus-gängen ausgestattet (Fig.2).

Der Wandler kann über ein AES-Signal synchronisiert werden.

Zusatzfunktionen Es können einige über Jumper konfiguriert werden:

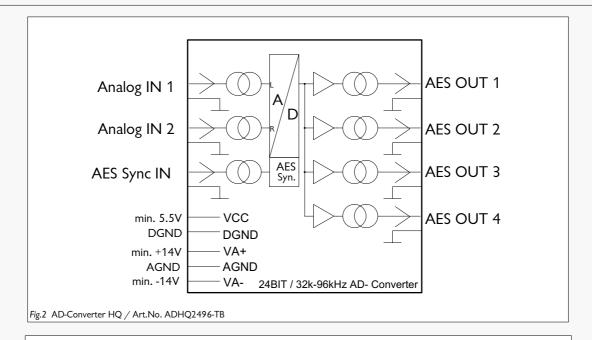

- 1) 96kHz Sample Frequenz
- 2) Vertauschung der Audiokanäle (CH1<->CH2)
- 3) VCXO aktiv / deaktiv

This AD converter equipped with an 24Bit/115dB/32k-96kHz AD converter, two transformer balanced or electrically balanced analog inputs and four AES outputs (Fig.2).

The converter can be locked to an AES synchronisation signal.

With on-board jumpers it is possible to configure some additional features:

- 1) 96kHz Sample Frequency
- 2) Audio Channels Exchange (CH1<->CH2)
- 3) VCXO enable / disable
